### My Preferences and Information that I Fully Understand and Accept:

1. I (please print and sign)	o have o have not read the following materials
by Dr. Adams about breast augmentation by in their entirety:	
Dr. Adams Website Information on Breast Augmentation	
<ul> <li>Patient Preferences Document</li> </ul>	
Before visiting with Dr. Adams, the following are my preferences and comight have negative short-term or long-term effects on my tissues or my complications, he will discuss these issues with me during our consultate.  2. Please Initial:	y chances for the best result with the least risk of
A) I understand that Dr. Adams can achieve virtually any size be characteristics of my tissues that we can't change. I also understand that can affect the appearance of my breasts as I get older and can affect my in the future.	at the choices I make, particularly with respect to implant size,
3. Please initial one of the following with regard to the BREAST S	SIZE YOU DESIRE:
A) I want a MINIMAL amount of enlargement.	
B) I want to be AS FULL AS I CAN BE AND ACHIEVE A MY TISSUES LONG-TERM. I leave the choice of implant size under size of breast that he feels is safest for my tissues long-term.	
C) I want a SPECIFIC SIZE BREAST—at least a cup blanks)	size AND at least acc implant. (Please fill in ALL
4. Please initial one of the following with respect to CHOICE O	F BREAST SIZE AND RISK OF FUTURE PROBLEMS:
A) I WANT A BREAST SIZE THAT WILL HAVE THE LE COMPLICATONS, OR NEED FOR ADDITIONAL PROCEDURE will choose an implant that will produce the fullest breast possible that is leave the choice of implant size entirely to Dr. Adams based on his evaluaccept that Dr. Adams cannot guarantee a cup size of my result, and I was a complex to the choice of my result, and I was a complex to the choice of my result, and I was a complex to the choice of my result, and I was a complex to the choice of my result, and I was a complex to the choice of my result, and I was a complex to the choice of my result.	ES SUCH AS A BREAST LIFT. I understand that Dr. Adams is safest long-term, unless I specify a smaller or larger breast. I luation of my tissues and body proportions. I understand and
B) I WANT A SPECIFIC BREAST SIZE, EVEN IF IT MIG- want a larger implant than Dr. Adams feels is optimal for my tissues, I u willing to accept all responsibility for appearance and increased risks of and time off work and normal activities in the future that may result fro tissues.	understand that I may not have a natural appearing breast. I am reoperations, complications, deformities, and additional costs
5. Please initial one of the following with respect to HOW YOU	WOULD LIKE YOUR BREASTS TO LOOK:
Three to six months after my augmentation (after my tissues relax), I wa	ant the upper portion of my breast to appear:
A) Inwardly curved, NOT FILLED IN THE UPPER PORTIO	ON OF THE BREAST.
B) FULL IN THE UPPER BREAST, with a straight or slightly	y outwardly curved profile in side view.
C) EXTREMELY FULL, WITH A VERY BULGING UPPE a breast that does not appear natural and may have excessive bulging with the breast. I also understand that an excessively large implant can cause additional operations or have permanent deformities, but I want the large	ith an unnatural appearing transition from the upper chest to e damage to my tissues long-term that could cause me to need

6. Choices and Preferences for Breast Augmentation (cont'd)
A) IMPLANT SHAPE I prefer: Shaped or Anatomic Round
B) IMPLANT SHELL TYPE I prefer: Textured Smooth
C) IMPLANT MANUFACTURER I prefer: Allergan MentorOther:
D) IMPLANT TYPE I prefer: Saline Silicone Cohesive Gel/ Form Stable/ Gummy Bear
D) I want Dr. Adams to choose and will abide by his choice
7. IMPLANT SIZE I prefer:
A) I want an implant that contains at leastcc (if you have an opinion). If I do not specify a number of cc's that I want in my implant, I am leaving the decision entirely up to Dr. Adams, and I will accept his judgment regardless of my breast size following surgery.
B) I have absolutely no specific preference for the number of cc's in my breast implant, and I want Dr. Adams to choose based on his evaluation of my tissues and proportions. If I ask Dr. Adams to choose the appropriate size implant that is best for me, I will abide by his choice, understanding that he will fill my breast as much as he feels it can be filled safely, without producing additional risks or tradeoffs.
<b>8.</b> I have been informed, and I understand that NO IMPLANT, REGARDLESS OF SIZE OR SHAPE, can guarantee upper breast fullness long-term, and the larger the implant I select, the more likely stretch of the lower breast envelope will allow loss of upper fullness.
9. Request for Implant or Size Change after Surgery:
A) If, after surgery, for any reason I desire a different size implant, I understand and accept that I must specify the exact type and size of implant in cc's, and that I am totally responsible for all costs associated with changing my implants, including surgeon fees, anesthesia fees, laboratory costs, and surgical facility fees
10. IMPLANT POCKET LOCATION I prefer:
A) I prefer my implant be placed UNDER the muscle. I have read and fully understand and accept the tradeoffs of placing an implant under muscle.
B) I prefer my implant be placed ABOVE the muscle. I have read and fully understand and accept the tradeoffs of placing an implant above muscle, and I understand and accept that I may see visible implant edges or other irregularities if the implant is placed above the muscle.
C) I do not have a preference for over or under muscle, and I want Dr. Adams to choose according to my tissue requirements. I have read and fully understand the tradeoffs of placing an implant either over or under muscle.
11. <u>INCISION LOCATION I prefer:</u>
A) Under the breast B) Around the areola C) In the armpit
D) I would like Dr. Adams to choose my incision location based on his assessment of my needs and optimal control during the operation, and I will abide by his decision.

## Factors Following My Augmentation that Dr. Adams Cannot Control

12. I (please print and sign)	have read Dr. Adams'
educational materials accessed on www.dr-adams.com	
patient educator, Christy Aguilar The following is esser	
before having Dr. Adams perform my breast augmenta	tion. I have discussed each of these items with my
patient educator and fully understand and accept the tra	ideoffs, risks, costs, and outcomes associated with each
item.	
understand and accept that there are several factors rela	al material, and after my patient educator consultation, I ted to my individual tissue characteristics, how I heal, Dr. Adams cannot predict by tests before surgery, and
INFECTION	
will remove one or both my breast implant. If an implauling will discuss the pros and cons of replacement with me. minimize further reoperations, risks, and costs to me. It required following removal to allow my breast tissue to	f I decide to replace the implant, a period of time will be
15 I was desirated and appear that Dr. Adams and	yet would with what I haire him to would with and that he
cannot change the qualities of the tissues of my breasts	ust work with what I bring him to work with, and that he that affect stretch following surgery or how I will heal. I form tests before surgery, or in any other way predict 1) and 2) how my body will heal or not heal following my
TICCUE CEDETOU	
TISSUE STRETCH  My tissue characteristics and stretch of tissues folloresults, need for additional surgery, and costs	owing my augmentation: How they can affect my
results, fieed for additional surgery, and costs	
<b>16.</b> If my tissues stretch excessively in any area Dr. Adams has no control. These deformities include t	following my augmentation, deformities can result which he following:
	east with the implant too low and the nipple pointing
2) shift of the implants to the sides with widening	of the gap between the breasts,
3) thinning of tissues over the implant allowing the	e implant to become visible or palpable (able to be felt)
in any area, and	
4) visible rippling in any area that can result when	the implant pulls on the overlying tissues.
<b></b>	
± • • • • • • • • • • • • • • • • • • •	nese deformities can occur in one or both breasts, and do
not occur equally on the two sides. I also understand as	
breasts require for optimal aesthetic results, the greater	
breasts never match exactly on the two sides, if any of t	nese deformities occur, differences in the two breasts
may be more noticeable and may not be correctable.	

18 I understand and accept that if any or all of the deformities caused by tissue stretch listed above should occur, even though the deformity may be visible, that Dr. Adams alone will determine whether additional surgery is needed. Dr. Adams will base this decision on whether he feels the potential benefits outweigh the potential risks of additional surgery and whether he feels I will get predictable improvement from additional surgery. I agree to abide by Dr. Adams' decisions in all matters pertaining to whether or not additional surgery is performed.
19 I understand and accept that if my tissues stretch excessively for any reason following my augmentation, that additional surgery will not change the qualities of my tissues that allowed them to stretch in the first place. As a result, additional surgery to correct stretch deformities is unpredictable at best due to the limitations my tissues impose, and that surgery for any of the stretch deformities listed above may not successfully correct the deformity, and that any or all of these deformities can occur again if my tissues stretch again.
WOUND HEALING/ CAPSULAR CONTRACTURE CONSIDERATION CHARACTERISTICS
My healing characteristics following my augmentation: How they can affect my results, need for additional surgery, and costs
<b>20.</b> I understand and accept that Dr. Adams has absolutely no control over how my body heals following my breast augmentation, and that he cannot predict (by tests prior to surgery) or control my individual healing characteristics.
21 I understand and accept that my body will form a lining (capsule) around my breast implant following my augmentation, and that the capsule around the implant may contract (tighten) excessively, causing a variety of deformities that may require additional surgery and despite additional surgery, may be uncorrectable and require implant removal. The capsules that form and the amount that they tighten are never equal on both sides, so the effects of the capsule on each breast are usually different.
22 I understand and accept that there are no tests or medical information that can accurately predict whether my capsules will tighten excessively and that following my augmentation, Dr. Adams has no control over how my body forms the capsule or how much the capsule will tighten or cause deformity.
23 I understand and accept that any or all of the following deformities can result from how the capsule forms and tightens, and that Dr. Adams cannot predict, prevent, or control the occurrence of any of these deformities:
1) Closing of a portion of the lower implant pocket (can be mild or severe), causing slight or significant upward displacement of the implant, and raising the fold under the breast leaving the incision scar below the fold (if the incision was made under the breast)
2) Closing of a portion of the outside of the implant pocket, causing flattening of areas of the outside contour of the breast and inward displacement of the implant.

- 3) Excessive firmness of the implant or breast
- 4) Visible edges or bulging deformities in any area of the breast
- 5) The quality of the scar that I will form wherever my incision is located.
- 6) The effects of my body healing and scarring in the area of the incision, adjacent areas to the incision or breast, or any area of the breast.
- 7) Discomfort or pain in areas of the breast
- 8) Change in sensation or loss of sensation in any area of the breast or adjacent areas.
- 9) Occurrence of lymph node enlargement or small bands near the incision caused by incision or obstruction of small lymph vessels (both of which usually subside without treatment in 3-6 weeks).

24 I understand and accept that any or all of these deformities can occur in one or both breasts, and not occur equally on the two sides. Although breasts never match exactly on the two sides, if any of these deformities occur, differences in the two breasts may be more noticeable and may not be correctable.	do
25 I understand and accept that if any or all of the deformities caused by my healing characteristics of the characteristics of the capsule (lining) around my implants occur, even though the deformity may be visible that Dr. Adams alone will determine whether additional surgery is needed. Dr. Adams will base this decision whether he feels the potential benefits outweigh the potential risks of additional surgery and whether he feels will get predictable improvement from additional surgery. I agree to abide by Dr. Adams' decisions in all matters pertaining to whether or not additional surgery is performed.	on
26 I understand and accept that if any of the deformities listed above occur following my augmentation, that additional surgery will not change the qualities of my tissues and healing characteristics tha caused the deformity in the first place. As a result, additional surgery to correct these deformities a) is unpredictable at best due to the limitations of my tissues and healing characteristics, b) that surgery for any of the deformities listed above may not successfully correct the deformity, and c) that any or all of these deformities can occur again after additional surgery because of my healing characteristics.	

#### RESPONSIBILITY FOR COSTS ASSOCIATED WITH ADDITIONAL SURGERIES

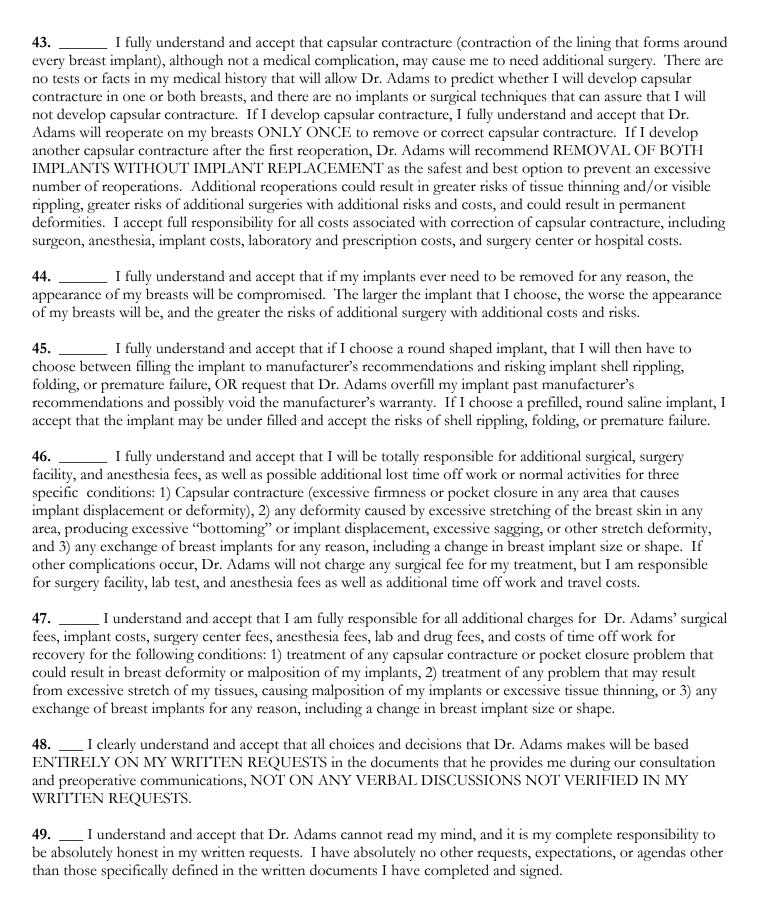

27. \_\_\_\_\_ Since Dr. Adams cannot predict or control my tissue characteristics or healing characteristics and how they will affect my chances of developing any of the deformities listed above related to tissue stretch and thinning or capsule or scar tissue formation following my augmentation, I understand and accept that should any of the deformities listed above (1-9) occur, if surgery is necessary to try to improve any of the following conditions, that I will be personally responsible for all costs associated with any surgery that is performed (please initial beside each number indicating your complete understanding and acceptance of all costs associated with surgery for each deformity):

- 1) excessive sagging or "bottoming out" of the breast with the implant too low and the nipple pointing excessively upwards,
- 2) shift of the implants to the sides with widening of the gap between the breasts,
- 3) thinning of tissues over the implant allowing the implant to become visible or palpable (able to be felt) in any area, and
- 4) Visible rippling in any area that can result when the implant pulls on the overlying tissues.
- 5) Closing of a portion of the lower implant pocket (can be mild or severe), causing slight or significant upward displacement of the implant, and raising the fold under the breast leaving the incision scar below the fold (if the incision was made under the breast)
- 6) Closing of a portion of the outside of the implant pocket, causing flattening of areas of the outside contour of the breast and inward displacement of the implant.
- 7) Excessive firmness of the implant or breast
- 8) Visible edges or bulging deformities in any area of the breast
- 9) The effects of my body healing and scarring in the area of the incision, adjacent areas to the incision or breast, or any area of the breast.
- 10) Discomfort or pain in areas of the breast
- 11) Change in sensation or loss of sensation in any area of the breast or adjacent areas.
- 12) Occurrence of lymph node enlargement or small bands near the incision caused by incision or obstruction of small lymph vessels (both of which usually subside without treatment in 3-6 weeks).

# Will Anyone Else Be Involved in Your Choices or Decision-Making? Part 1

If any other person will be involved in the choices or decisions you will make regarding your augmentation, or will be involved in any discussions with Dr. Adams or his staff following surgery regarding your choices or your result, they will need to be as informed as you are to prevent their misinterpreting your choices, your decisions, or your result. They will need to understand all of the choices, tissue limitations, tradeoffs, and risks that we discuss with you. We will provide you with the necessary information and copies of your documents to review and discuss with them, but you are responsible for encouraging them to become familiar with your information and choices.

Will anyone else be involved in the choices or decisions you will make regarding your augmentation, or in any

discussions with Dr. Adams or his staff following surgery regarding your choices or your results?  Yes /No (Please circle one and initial)
If yes, please specify: Name:Relationship:
Please read and if you understand and accept the statements, initial each of the following items:
53 Prior to my patient educator consultation, I was asked if anyone else would be involved in the choices or decision-making process for my breast augmentation, and I was encouraged to bring them with me during each consultation visit or have them participate in patient educator telephone calls.
54 If I do not specify in this document another person who will be involved in my choices or decision-making, I specifically request Dr. Adams and his staff to have no discussions following surgery about any aspect of my care or results with anyone other than me. I understand and accept that Dr. Adams and his staff will not discuss any aspect of my choices, decisions, requests, or result following surgery with anyone who was not educated, informed, or who did not answer all of the items in the second section of this document.
55 If I do not specify another person who will be involved, following surgery I accept total and complete responsibility for dealing with other peoples' opinions regarding my choices or my result. I will not involve anyone else in discussions with Dr. Adams or his staff following surgery regarding any aspect of my result if I did not specify and involve that person to assure that they are educated and informed prior to my surgery.
56 If I choose to involve anyone else in my choices, decision-making, or in any evaluation or comment on my results, I will be personally responsible for providing that person a copy Dr. Adams educational material Dr. Adams' choices documents, informed consent documents, operative consent forms, and my breast implant manufacturer's information and operative consent forms. Further, I will encourage that person read the documents in detail so that we reach a common understanding and acceptance of choices, risks, and tradeoffs prior to my surgery. Lastly, I will invite and encourage that person to participate in all of my consultations with my patient educator (in person or by phone) for my consultation with Dr. Adams.
57 I understand and accept that I alone am ultimately responsible for the decisions I make and the requests that I make of Dr. Adams. If I involve anyone else in my decisions, it is my responsibility alone to reconcile their wishes and thoughts with what I choose for my own body. Dr. Adams will rely solely on my written requests that I will complete during my education and consultation process, and any other person's input must be included in my written requests prior to surgery. Prior to surgery, I alone am responsible for making my choices and decisions.

Witness: (please print)

Please ask the person you choose to involved in your choices or decision-making prior to your breast augmentation procedure to please complete and sign the document entitled
Will Anyone Else Be Involved – Part 2. You are then responsible for returning the form to our office at least two weeks prior to your surgery date. If you have specified a person to be involved, and this form is not returned to us at least two weeks prior to surgery, we will be unable to perform your surgery.
58 I have been given a copy of Will Anyone Else Be Involved- Part 2 and am aware that it must be returned to Dr. Adams' office two weeks prior to my surgery date.

## Aesthetic Society Applauds FDA's Effort to Collect Data Concerning a Rare Condition Associated with Breast Implants

New York, NY (January 26, 2014) – The American Society for Aesthetic Plastic Surgery (ASAPS) announces today its support of a new national registry for <u>breast implants</u> that will be compiled by the American Society of Plastic Surgeons (ASPS) in collaboration with the Food and Drug Administration (FDA). This registry will document reported cases of a very rare condition, Anaplastic Large Cell Lymphoma (ALCL), in the presence of <u>breast implants</u>.

As patient advocates, the members of ASAPS applaud the efforts of the Food and Drug Administration (FDA) to ensure that sound scientific practices are the foundation for information and research, including post market surveillance.

ALCL in the presence of <u>breast implants</u> has been noted in sporadic case reports over the past 25 years. To date, ALCL has only been identified in 34 cases out of an estimated 5 to 10 million women with implants worldwide. As opposed to systemic ALCL which can occur anywhere in the body, this condition appears in the scar tissue that forms around the implant. It is encouraging that when this condition occurs in the presence of <u>breast implants</u> the patients have responded to a variety of treatments, including simple removal of the implant and surrounding scar capsule.

ASAPS joins both the FDA and ASPS in its view that breast implants are safe. "Breast implants are the most studied device in medical history. As physicians, our primary commitment is providing safe and effective patient care. We share in the commitment of FDA and ASPS to the continued device evaluation and monitoring," said Felmont Eaves, III, MD, of Charlotte, NC, and ASAPS President.

ASAPS recommends that all women including those with breast implants should follow their normal routine in medical care and follow-up, specifically regular self examination and mammography when appropriate. Any woman should watch for changes in her breasts such as pain and swelling and contact her physician if she has any questions. Further information can be found on <a href="https://www.breastimplantsafety.org">www.breastimplantsafety.org</a>

### **About ASAPS**

The American Society for Aesthetic Plastic Surgery (ASAPS) is recognized as the world's leading organization devoted entirely to aesthetic plastic surgery and cosmetic medicine of the face and body. ASAPS is comprised of over 2,600 Plastic Surgeons; active members are certified by the American Board of Plastic Surgery (USA) or by the Royal College of Physicians and Surgeons of Canada and are fully trained in the complete spectrum of surgical and non-surgical aesthetic procedures; international active members are certified by equivalent boards of their respective countries. All members worldwide adhere to a strict Code of Ethics and must meet stringent membership requirements. Website: <a href="https://www.surgery.org">www.surgery.org</a>
